Safety Features

AUTO RESCUE DEVICE

In the event of power cut off, the elevator will continue to operate till the nearest floor and open the doors to let passengers out safely.

INFRARED LIGHT CURTAIN

Full height infra red curtain with multiple cross crossing light beams detect the smallest obstruction in door path and stop doors from closing.

OVER LOAD SENSOR WITH AUDIO VISUAL INDICATION

On overloading of the lift, car audio-visual indication is provided and doors are kept open till excess load is removed.

EMERGENCY ALARM & "PUSH TO TALK"

In case of any emergency or power failure, help can be obtained by alarming or by communicating at lobby through this system which is battery operated and self charging as shown in picture.

SAFETY IN CASE OF OVER TRAVEL

Three phase electric power is disconnected from control panel and motor, the moment elevator car moves beyond the limit of top and bottom terminal floors causing immediate application of the brake to bring the elevator to halt.

CAR EMERGENCY LIGHT & FAN

The emergency light is always illuminated in normal condition and switches itself automatically to battery back up in case of power failure as shown in picture.
(Block-D) also operates for minimum 20 minutes after power failure.

SAFETY IN CASE OF ROPE BREAKAGE

In the case of breakage of ropes, elevator speed exceeds the rated speed in the downward direction due to gravitational acceleration. the over speed governor activities the clutch mechanism thereby switching off main controls and jamming the elevator car safety on guide rails.

CAR FAN AUTOMATIC SLEEP

Car fan automatically stops when there are no registered floor calls resulting into saving in power and enhancing its life.

VOICE ANNUNCIATOR WITH MUSIC

This system provides detailed information to passengers related to next floor direction of movement, door opening/closing, scheduled operations and other information depending on the building needs. This system features natural electronic voice synthesizers.
